

Safety use

# Operating and Assembly Instructions for couplings HKS 5, HKSI 5, HKDS 5, HKDSI 5 with Declaration of Conformity according to DIN EN ISO 13849-2

Read the Operating and Assembly Instructions prior to assembly, starting installation and handling! Keep for future reference!

# 1 General

## 1.1 Information about the operating and assembly instructions

These operating and assembly instructions provide important instructions for working with the device. They must be carefully read prior to starting all tasks, and the instructions contained herein must be followed.

In addition, applicable local regulations for the prevention of industrial accidents and general safety regulations must be complied with.

# 1.2 Scope of delivery

- coupling
- Operating and Assembly instructions

# 1.3 Explanation of symbols

Warnings are indicated by symbols in these operating and assembly instructions. The warnings are introduced by signal words that express the scope of the hazard.

The warnings must be strictly heeded; you must act prudently to prevent accidents, personal injury, and property damage.

#### **WARNING!**

Indicates a possibly dangerous situation that can result in death or serious injury if it is not avoided.

#### CAUTION!

Indicates a possibly dangerous situation that can result in minor injury if it is not avoided.

## **CAUTION!**

Indicates a possibly dangerous situation that can result in material damage if it is not avoided.

## NOTES!

Indicates useful tips and recommendations as well as information for efficient and trouble-free operation.

#### **NOTES!**

Do not use a hammer or similar tool when installing the device due to the risk of damage occurring to the bearings or coupling!

## **WARNING!**

If components are missing, do not add these components by own components. Otherwise the declaration of conformity loses its validity.

### 1.4 Disclaimer

All information and instructions in these (operating and assembly instructions) have been provided under due consideration of applicable guidelines, as well as our many years of experience.

The manufacturer assumes no liability for damages due to:

- Failure to follow the instructions in the operating and assembly instructions
- Non-intended use
- Deployment of untrained personnel
- Conversions of the couplings

In all other aspects the obligations agreed in the delivery contract as well as the delivery conditions of the manufacturer apply.

# 1.5 Copyright

#### NOTES!

Content information, text, drawings, graphics, and other representations are protected by copyright and are subject to commercial property rights.

It is strictly forbidden to make copies of any kind or by any means for any purpose other than in conjunction with using the device without the prior written agreement of the manufacturer. Any copyright infringements will be prosecuted.

### 1.6 Guarantee terms

The guarantee terms are provided in the manufacturer's terms and conditions.

#### 1.7 Customer service

For technical information personnel is available that can be contacted by telephone, fax or email. See manufacturer's address on page 2.

# 2 Safety

#### **DANGER!**

This section provides an overview of all the important safety aspects that ensure protection of personnel, as well as safe and trouble-free coupling operation. If these safety instructions are not complied with significant hazard can occur.

# 2.1 Responsibility of the owner

The coupling is used in commercial applications. Consequently the owner of the coupling is subject to the legal occupational safety obligations and subject to the safety, accident prevention and environmental protection regulations that are applicable for the couplings area of implementation. For all subsequently made works by the purchaser on components with fault exclusion the purchaser shall be solely responsible. Warranty claims arising from inadequately performed rework will not be taken over by Johannes Hubner Giessen. Any mechanical rework on components with fault exclusion needs the necessary examination and the written approval by Johannes Hubner Giessen.

#### NOTE!

The validity of the safety certificates is limited to 20 years.

#### 2.2 Personnel

Installation and commissioning as well as disassembly routines must be carried out by skilled technical staff only.

#### 2.3 Personal protective equipment

Wear personal protective equipment such as safety shoes and safety clothing to minimise risks to health and safety when carrying out work such as mounting, disassembling or commissioning. Adhere to all applicable statutory regulations as well as the rules and standards determined by the owner.

#### 2.4 Intended use

The coupling has been designed and constructed exclusively for the intended use described here.

The function will only be reached when the coupling is carried out according to these instructions. Only use components specified by Johannes Hubner Fabrik elektrischer Maschinen GmbH.

#### 2.5 Non intended use

The function as a safety component can only be achieved if all the limits stated in the instructions are complied with. Exceeding is improper.

# 2.6 Special dangers

Residual risks that have been determined based on a risk assessment are cited below.

# 2.6.1 Rotating shafts

## WARNING!

### Danger of injury due to rotating shafts and hot surfaces!

Touching rotating shafts can cause serious injuries.

#### Therefore:

Do not reach into moving parts/shafts or handle moving parts/shafts during operation. Close to protect from injury all access openings in flanges with the corresponding plug screw, and provided you exposed rotating components with protective covers. Do not open covers during operation. Prior to opening the covers ensure that all parts have come to a standstill.

# 2.6.1 Exceeding the maximum speed

### **WARNING!**

If the mechanical data according to the table become exceeded, the declaration of conformity loses its validity.

# 3 Mechanical Data

| Specification        | Value   | Unit |
|----------------------|---|------|
| Shock resistance     | short time 100<br>continuous load 10  | g    |
| Vibration resistance | Short time 20 continuous load 3   | g    |
| Torque               | 3   | Nm   |
| Temperature range    | -50 +120 (HKS and HKDS)<br>-25 +85 (HKSI and HKDSI)                           | °C   |
| Max. speed           | 6000  | rpm  |
|                      | HKS 5 / HKSI 5:  axial misalignment: ± 1 mm  angle : 0,5°                     |      |
| Mounting precision   | HKDS 5 / HKDSI 5:  axial misalignment: ± 1,5 mm  radial misalignment: ± 0,5mm |      |

## NOTE!

If the permissible mounting accuracies become exceeded, the load on the coupling increases. The fatigue strength can then no longer be ensured

The coupling is equipped with an emergency runner which allows an emergency run with reduced angular accuracy in the event of overloading (fail safe).

The breakage of an overloaded spring should be monitored by the signal matching of the motor and transmitter signals. If these values deviate from one another, a coupling defect must be assumed by overloading and the entire system must be transferred to a safe state. The coupling must then be checked for damage (see chapter 7.3 inspection schedule ").

# 4 Installation and Commissioning

# 4.1 Safety note

#### Note!

Observe the safety instructions contained in chapter 2 when installing and during other work on the coupling!

#### **Personnel**

Installation and commissioning must be carried out by skilled technical staff only.

#### 4.2 Technical Notes

#### Danger

Do not use a hammer or similar tool when mounting the coupling.

#### **Ambient temperature**

The max. permissible ambient temperature must be observed. Otherwise the declaration of conformity loses its validity.

# 4.3 Required Tools

Allen key 2 mm

### 4.4 Preparation of the installation

- 1. Clean the shafts and check for damage. Repair any damage.
- 2. Check the existing shaft offset (axial, radial and angle) and adjust with the permissible values.

### 4.5 Mounting

- 1. Lightly grease the (motor) shaft
- 2. Fit coupling onto (motor) shaft. You must be able to mount the coupling without force.
- 3. Secure the coupling hub on the (motor) shat with a grub screw
- 4. Lightly grease the encoder shaft.
- 5. Mount the encoder.
- 6. Ensure that the coupling is not prestressed as far as possible.
- 7. Secure the coupling hub on the encoder shaft with a grub screw.

# **WARNING!**

The spring lamellas must not be overloaded during assembly. For this reason, it is forbidden to act on the hubs by means of hammer or similar tools. Installation must be easy.

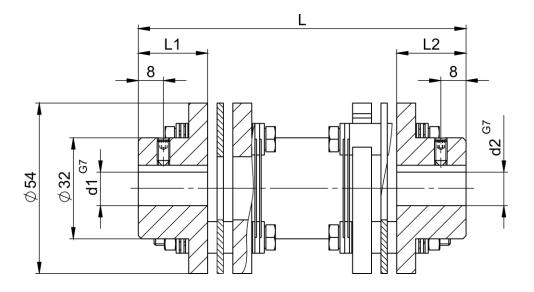

# 5 Dismantling

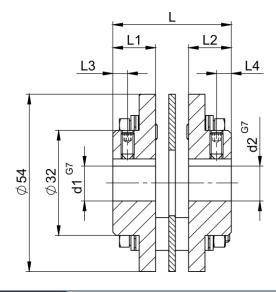

To dismantle follow the installation in reverse order.

# 6 Mounting protocol

| Date             |  |
|------------------|--|
| Serial number    |  |
| Fitter           |  |
| Signature fitter |  |

The completed assembly protocol is part of the operating authorization and kept in a safe until the end of the period of use of the coupling.

# 7 Inspections

## 7.1 Safety inspections

### **NOTE/PERSONNEL**

Skilled technical staff only are permitted to inspect the coupling and the installation. Observe the safety instructions contained in **Chapter 2** when inspecting or working on the coupling!

#### 7.2 Maintenance Information

The coupling is maintenance free. However, to guarantee optimum fault-free operations we recommend that you carry out the following inspections.

## 7.3 Inspection schedule

| Interval | Inspection                          |
|----------|-------------------------------------|
|          | Check spring lamellas for damage    |
| Yearly   | Visual check for visible changes    |
|          | Check clamping screws for tightness |

### **WARNING!**

A repair may only be carried out by Johannes Hubner Fabrik elektrischer Maschinen GmbH.

# 8 Disposal

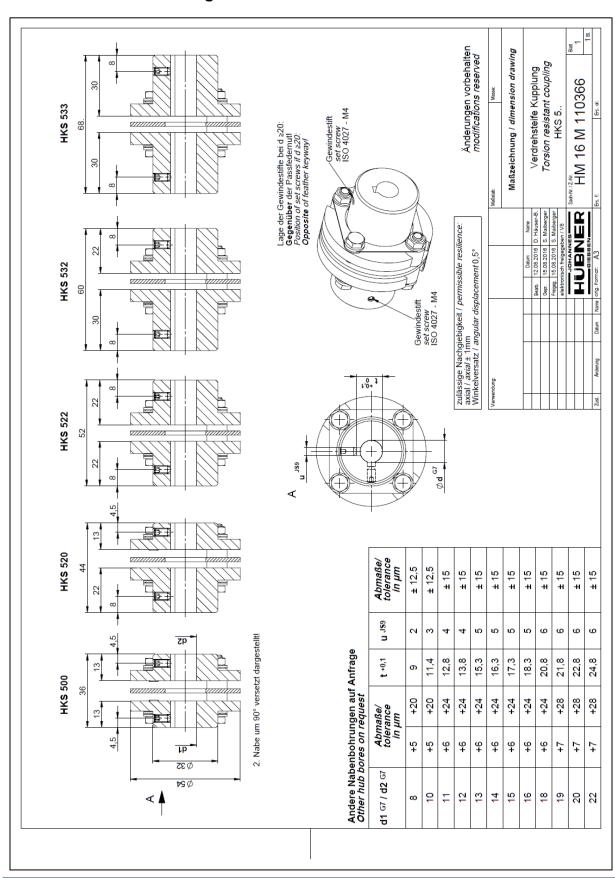

# 8.1 Disposal procedure

The manufacturer is not obliged to take back the adapter flange.

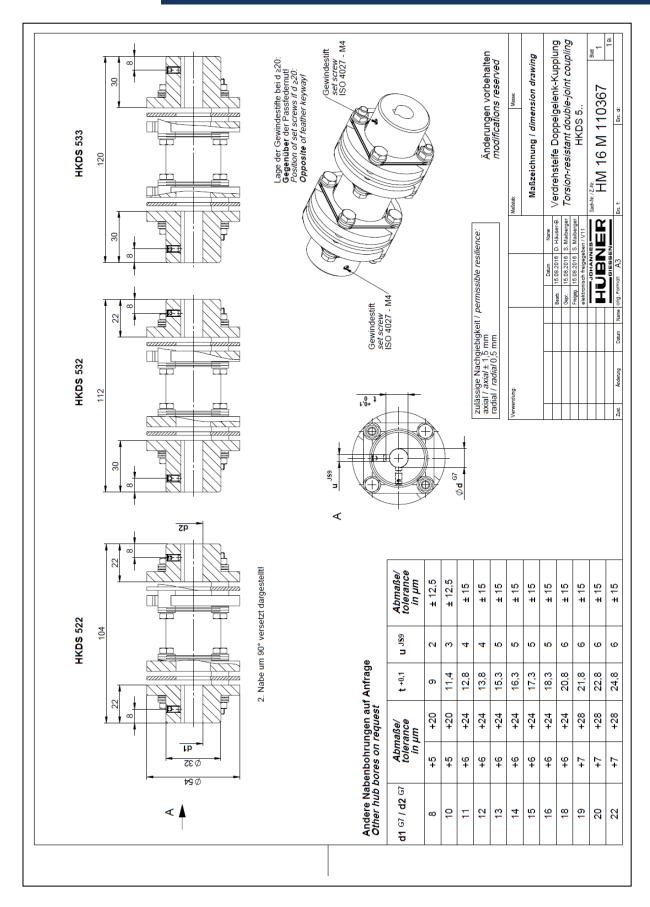

For information on environmentally sound disposal please contact your local authority or a special disposal company.

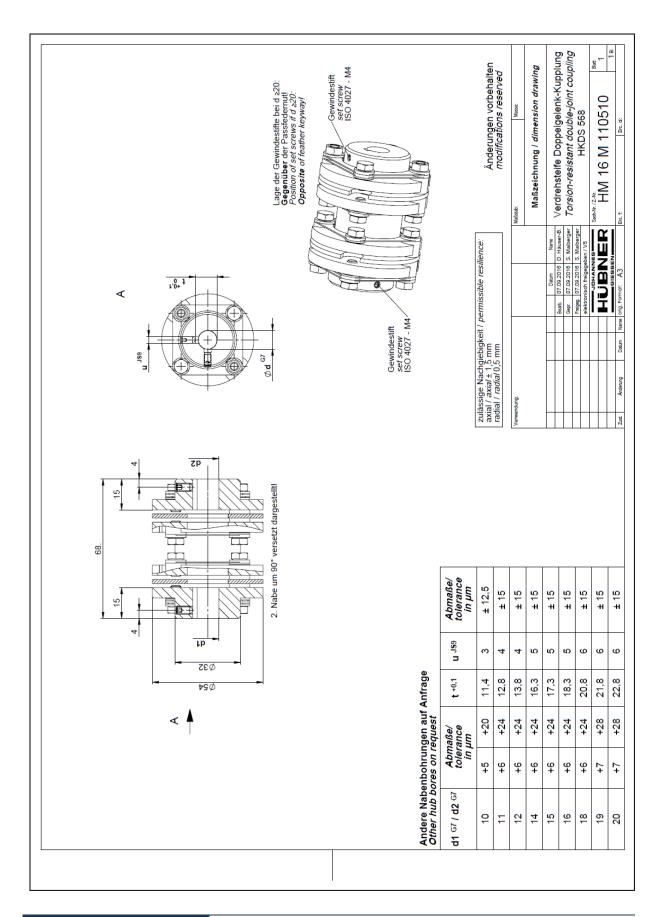

# 9 Dimension drawings

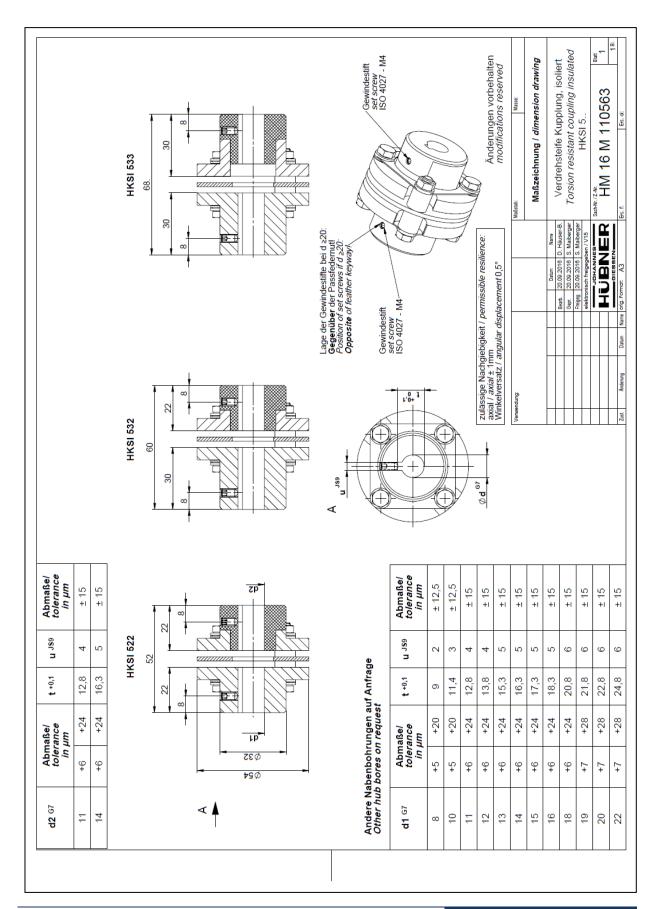

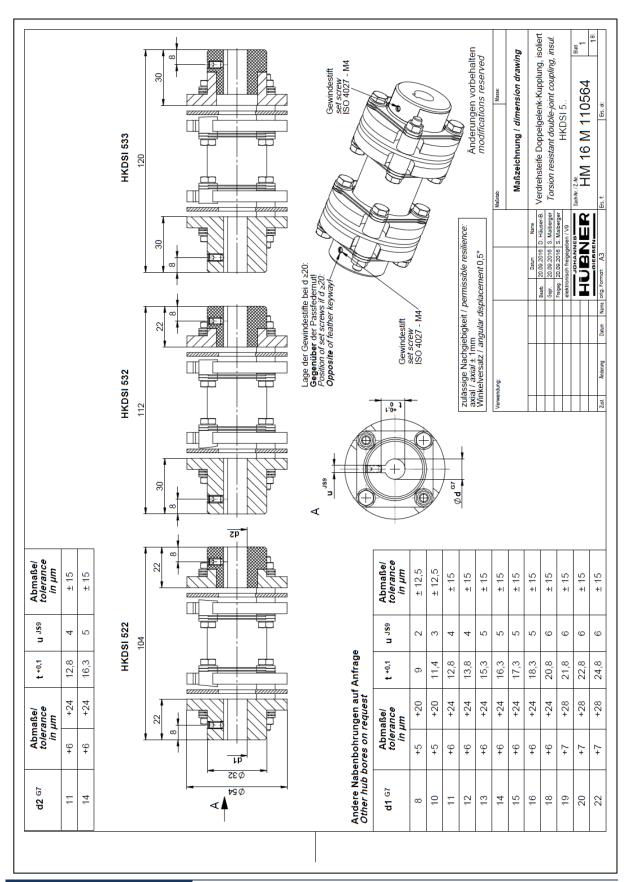

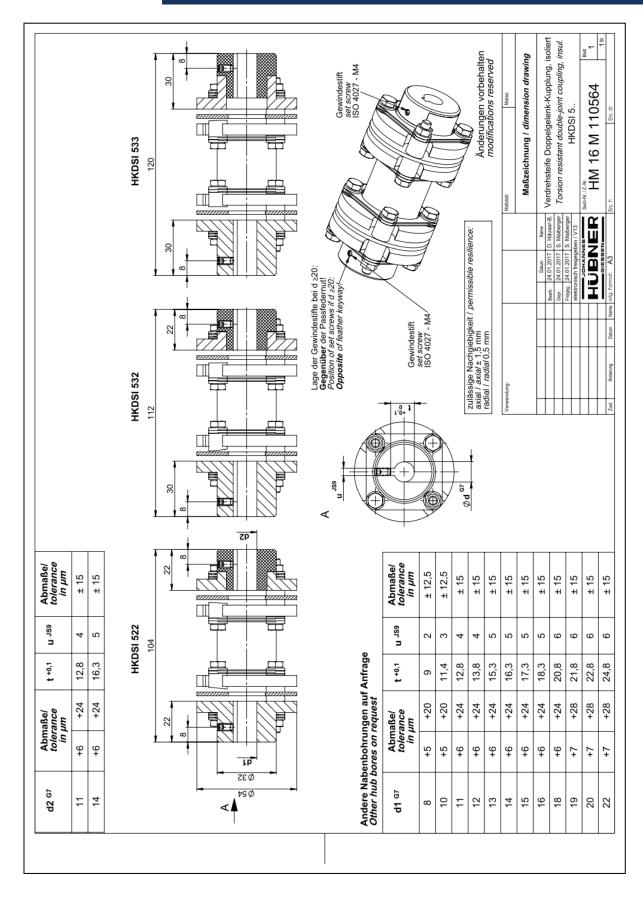

# 10 Declaration of Conformity

Declaration of Conformity according to ISO/IEC 17050-1

- 1) Nr. 1038
- 2) Name des supplier: Johannes Hübner Fabrik elektrischer Maschinen GmbH

address: Siemensstr. 7

35394 Gießen

- 3) Object of the declaration: fault exclusion of the couplings HKS 5, HKSI 5, HKDS 5, HKDSI 5
- 4) The product described above is in conformity with the requirements of the followings documents:

Document-No. Title Edition / Date of issue

5) 1 DIN EN ISO 13849-2

Safety of machinery – Safety related 10/2012

Parts of control systems - Part 2 Validation

- 2 IEC 61800-5-2: Adjustable speed electrical power 2016 drive systems, Part 5-2: Safety requirements - Functional
- 6) The installation and operating conditions set out in the operating and installation instructions must be strictly observed. The permanent and structural strength was demonstrated by calculation for the operating conditions specified in the operating and assembly instructions.

Signed for and on behalf of

Johannes Hübner Fabrik elektrischer Maschinen GmbH

Gießen, the 30/01/2017

Frank Tscherney, GF
